PROJECT OBJECTIVE

The background of the slide is a close-up photograph of a bee in flight, positioned on the left side, moving towards a large purple flower on the right. The bee's wings are blurred due to motion, and its body is covered in fine hairs. The flower has several bright yellow stamens. The background is a soft, out-of-focus green, suggesting a natural outdoor setting.

THE OPERATING GROUP "CLOSING CYCLES" works on the improvement of the production processes of small companies of processing food in Extremadura, creating relationships between farmers, livestock, food processing industries and other sectors industries; thanks to the research applied by the technological centers in the region with which the project collaborates, investigating the CIRCULAR ECONOMY model for the optimization of by-products. The project is exemplified in the panel of the Hive.
