EIP-AGRI Workshop Organic is Operational

June 14 – 15, 2017 – Hamburg, Germany

EIP-AGRI Workshop Organic is Operational

Day 2 – Thursday, 15 June 2017

- 8:15 9:00 Registration for day 2
- 9:00 9:30 Plenary session:
 - Key ideas emerging from day 1 activities
 - Introduction to breakout sessions

Working together in a multi-actor setting

9:30 – 11:00 Breakout sessions: How can we get the best out of multi-actor groups?

Parallel sessions to discuss and exchange good practices to get the best out of multi-actor groups. Possible topics are farmers' involvement, communication channels, coordination and facilitation, reporting and sharing of results.

11:00 - 11:30 Coffee break

Networking for Operational Groups

- 11:30 11:40 Networking tools and possibilities to connect EIP-AGRI actors *Willemine Brinkman (EIP AGRI Service Point)*
- 11:40 12:40 Interactive session: How can we further exchange between Operational Groups after the workshop?
- 12:40 12:55 Plenary wrap-up Susanne Padel & Claude St Pierre (EIP AGRI Service Point)
- 12:55 13:00 Closing words Alberto D'Avino (European Commission – DG AGRI)
- $13{:}00-14{:}00$ Lunch and goodbye for now

funded by the European Commission

Susanne Padel EIP-AGRI Service Point

Some observations

- Lucky to have such a very diverse group of people coming together
- Although it is not always easy to be specific, there is an overall picture emerging,
 - much of it specific to organic agriculture

• Three key points that we picked out

We do have common technical issues in organic agriculture

- Yield stability remains an important issue and is likely to remain
- Our other common technical issues are challenging, but also create an opportunity for EIP AGRI projects
 - Legumes / Nitrogen
 - Climate change
 - Plant protection

Markets do matter

- In organic agriculture (technical) innovation has to consider market access/ implications
- Smaller farms have different innovation needs
 - e.g. machinery
- The market is also an opportunity
 - Market for innovation
 - Develop the organic market in innovative ways

Groups are at the core of what we are trying to do

- But, working with farmers implies new methods
- Organic and non-organic farmers working together
- Not always easy in practice
 - Flexibility versus control in innovation
 - Data collection protocols

Something more to think about

- Languages
- Networking methods
- Never too early to start thinking about after the project ends
 - Scaling-up
 - Continuity
- Some good practices already mentioned, more to come
- Remember to propose topics for the Open Space
